The image consists of two screenshots of a web browser displaying GitHub pages. The top screenshot shows the GitHub profile for 'john-craig'. The profile includes a green and white logo, a bio section with an 'Add a bio' button, and a '1 contribution in the last year' calendar grid. A 'ProTip!' banner at the top suggests updating the profile. The bottom screenshot shows the repository page for 'john-craig / cmpt220craig'. It features a 'Quick setup' section with instructions for cloning the repository using HTTPS or SSH, creating a new repository on the command line, pushing an existing repository, and importing code from another repository. The repository page also shows options to watch, star, or fork the repository.

Learn how we count contributions.

Less More

This is your contribution graph. Your first is for joining GitHub and you'll earn more as you make additional contributions. More contributions means a darker green square for that day. Over time, your chart might start looking something like this.

We have a quick guide that will show you how to create your first repository and earn more green squares!

Quick setup — if you've done this kind of thing before

[Set up in Desktop](#) or [HTTPS](#) [SSH](#) <https://github.com/john-craig/cmpt220craig.git>

We recommend every repository include a README, LICENSE, and .gitignore.

...or create a new repository on the command line

```
echo "# cmpt220craig" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/john-craig/cmpt220craig.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/john-craig/cmpt220craig.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code
